### Legend

	main road		contour
	minor road		form line
	large path		knoll
	small path		depression
	indistinct path		stump, rootstock
	fence		gully
	power line		steep slope
	open land		cliff
	rough open		boulder
	scattered trees		boulder field
	forest: run		open water
	forest: slow run		stream
	forest: walk		seasonal stream
	forest: fight		human-made obj.
	undergrowth		building
	stony ground		out of bounds
	distinct veg bndy		control

### Instructions:

**This is a self-lead activity. You are on your own!**  
**Be safe and travel in small groups if possible.**

- Find the start/ finish at the end of front of the lodge fence.
- Orient your map to the North and face North. **The top of the map is always North.** If you have a compass the red part of the compass needle points North so turn your map until the red needle points to the top of your map. If you don't have a compass, North is the direction of the lodge from the start (the Hwy is always N from the ski hill). Rotate your map so the top of the map aligns with North and **always keep it that way.**
- Make a plan to get to your first control. Look at legend and big features which help you identify where you are (e.g. buildings, trails, intersections). Find your control. Check if the control number matches the code on your map (e.g. control #1 is the path and has code 63 on it). Once you find the control make sure to orient your map to the North and make a plan on how to get to your next control.
- Repeat these steps until you find all of the controls and arrive at the finish.

If you can't find a control return to the control, you found previously and try it again. Go slow and stay in touch with the map: always keep track of where you are by checking for features as you follow your route.

Always keep your map oriented to the NORTH!
